

Website Development Roadmap

Sarvoday Marine Services Pvt. Ltd. — incl. Cabotage Logistics Solutions

Prepared for: Web Development Team

1. Project Overview

Sarvoday Marine Services Pvt. Ltd. requires a new corporate website covering two business lines under one brand umbrella:

- Sarvoday Marine Services — core marine, cargo, and container inspection business.
- Cabotage Logistics Solutions — a newly added service line offering logistics and transportation solutions (domestic/regional cargo movement), under the same Sarvoday brand.

The site should present the company as an established, trusted PAN-India inspection and logistics partner — services are delivered pan-India, not limited to the branch office cities listed in Section 6 — with a modern, corporate visual style inspired by the reference site noted in Section 7.

2. Brand Assets

Logo

Sailboat icon + wordmark, navy blue. File provided separately to the developer as a high-resolution asset (request vector/SVG version from Sarvoday if available, for crisp scaling).

This is the single logo for the group — Cabotage Logistics Solutions uses the same Sarvoday branding (it is a newly added service line, not a separately branded division), so no second logo is required.

Color Palette (proposed, based on logo)

- Primary — Navy Blue (from logo wordmark)
- Accent — Sky Blue (from sailboat icon gradient)
- Secondary accent — Orange/Red (from reference site call-to-action buttons)
- Neutral — White / Light Grey backgrounds

3. Company Profile — Sarvoday Marine Services

Founded in November 2014, Sarvoday Marine Services Pvt. Ltd. has established itself as a trusted name in the shipping, logistics, inspection, and rail operations industry. Backed by a team of over 100 trained professionals, the company mobilizes skilled manpower PAN India, ensuring efficient project execution while maintaining high standards of quality, safety, and operational excellence.

Leadership & Team

- Experienced Leadership — board of directors with deep industry knowledge driving strategy and decision-making.
- Dedicated Teams — employee skills are evaluated and matched to responsibilities; regular training and grooming sessions keep teams sharp and adaptable.

Vision

To set new standards in shipping and logistics, with a continued focus on seamless operations, customer satisfaction, and sustainable growth.

4. Services Offered — Sarvoday Marine Services

Marine Inspections

- Draft Survey
- Barge Gauging
- Bunker Surveys
- Condition Surveys
- Damage & Loss Assessments
- Hatch Inspections

Liquid Cargo Inspections

- Quantity determination of liquid cargo / Ullage Survey
- Loss investigations
- Bunker Survey
- Tank Inspections

General Cargo Inspections

- Cargo arrival supervision at designated premises (port, factory)
- Physical verification and quality check
- Onboard / Onshore, Load / Discharge supervision
- Stowage supervision
- Lashing and securing supervision

Project & ODC (Over Dimensional Cargo)

- Inspection at factory / industrial premises
- Lashing & Securing Supervision
- Loading Supervision
- Measurement

Container Inspections

- Empty container inspections
- Maintenance & Repair inspections
- Stuffing / De-stuffing supervision at all locations
- Reefer containers
- Supervision of loading/unloading containers on container flats or racks
- Supervision at CFS / ICD / FTWZ / Container Terminals / Empty Yards
- Supervision of lashing of cargo on containers & issuance of lashing certificate

5. Cabotage Logistics Solutions (New Service Line)

Cabotage is a customer-focused logistics and transportation solutions offering, newly added under the Sarvoday Marine Services brand. It is committed to delivering reliable, efficient, and cost-effective supply chain services, specializing in coordinating seamless cargo movement across domestic and regional markets, combining industry expertise, technology-driven processes, and a dedicated service team to ensure timely deliveries and end-to-end visibility.

The goal is to build long-term partnerships by offering customized logistics solutions that support clients' business growth and operational efficiency.

Core Values

- Reliability
- Safety
- Integrity
- Customer Excellence
- Innovation

Cabotage uses the same Sarvoday branding and logo. It should be nested under the Services section as one more service offering — not featured or teased on the homepage as a separate highlight — since it is part of Sarvoday's services, not a standalone division.

6. Office Locations & Contact Details

Note for developer: branch offices below are physical locations, but Sarvoday's services are delivered PAN-India — copy on the Locations/Services pages should make clear that coverage isn't limited to these cities (e.g. "Head Office, Branch Network, and PAN-India Service Coverage" rather than implying service areas end at the branch list).

Field	Details
Head Office	F-3, Hindorna Road, Siddhi Plaza Complex, 2nd Floor, Rajula, Dist. Amreli, Gujarat
Branch Offices (GJ)	Mundra, Hazira, Ankleshwar, Bharuch, Dahej, Vapi, Panoli, Surat, Vadodara, Viramgam, Morbi
Branch Offices (MH)	Mumbai, Pune
Branch Offices (WT)	Agartala
Branch Offices (WB)	Kharagpur, Haldia
Phone	+91 9723599247 / +91 7043230841
Email	Rajkumar Mall (rajkumar@sarvodaymarine.co.in) Director / Harshit Gajjar – (gm@sarvodaymarine.co.in)
Contact Person	Rajkumar Mall - Director / Harshit Gajjar — General Manager

7. Design Reference

Client has shared reference screenshots from hariex.com (Hariex Logistics) purely as a layout/style reference — not to be copied verbatim, and not affiliated with Sarvoday. Elements to draw inspiration from:

- A dedicated service page per major offering (e.g. modeled on Hariex's "Multi-Model Logistics" page), with a clear route/coverage list section and an "Enquiry Now" call-to-action button.
- A stats/trust banner near the top of the homepage (e.g. shipments delivered, satisfied clients, years of experience, worldwide/PAN-India clients) with animated counters.
- A 4-step "Working Process" section using icon + number + short description tiles (adapt content to Sarvoday's own workflow — e.g. Enquiry → Survey/Inspection Scheduling → On-site Execution → Report Delivery).
- A footer with four columns: brand blurb + social icons, Quick Links, Services list, and Contact Us details.

The overall tone should be corporate, trustworthy, and industry-focused, using the Sarvoday brand palette rather than Hariex's orange/red scheme.

8. Technical Requirements — Dynamic Website

This should be built as a dynamic, database-driven website (not static HTML) so non-technical staff can update content without developer involvement. Minimum requirements:

Content Management System (CMS)

- A CMS (e.g. WordPress, or a custom lightweight CMS) so Sarvoday staff can independently update text, images, and service listings.
- Editable sections: services list per category, branch office list, leadership/team bios, news or updates (if desired).

Admin Panel

- Secure login-protected admin/back-office panel for the site owner.
- Ability to add/edit/remove branch offices and contact details without code changes.
- Ability to add/edit services under each category (Marine, Liquid Cargo, General Cargo, Project & ODC, Container).
- Dashboard to view and export enquiry/contact form submissions.
- Role-based access if more than one staff member will manage content.

Forms

- "Enquiry Now" / quote request form on service pages (name, company, phone, email, cargo/service type, message) — mirroring the reference site's quote button.
- General Contact Us form (name, email, phone, subject, message) with validation and spam protection (e.g. reCAPTCHA).
- Form submissions should email the team (info@sarvodaymarine.com) and also be stored/viewable in the admin panel.
- Optional: WhatsApp click-to-chat button, given the branch network spans multiple states.

Other Dynamic Features to Consider

- Animated stats/trust counters on the homepage, pulling from admin-editable numbers (years in business, branches, professionals, projects completed).
- Google Maps integration showing Head Office and branch locations.
- Mobile-responsive design (majority of enquiries likely to come from mobile).
- Basic SEO setup — meta titles/descriptions per page, sitemap.xml, consistent NAP (Name/Address/Phone) once the address discrepancy in Section 6 is resolved.

Hosting/CMS platform choice is left to the developer's recommendation unless the client specifies otherwise (see Section 9).

9. Proposed Sitemap

- Home — hero banner, trust/stats strip, services overview, working-process section, testimonials/clients (if available), footer. (Cabotage is not featured separately here — it lives under Services, see below.)
- About Us — company history (founded 2014), leadership, vision, team.
- Services — overview page linking to sub-pages:
 - Marine Inspections
 - Liquid Cargo Inspections
 - General Cargo Inspections
 - Project & ODC
 - Container Inspections
 - Cabotage Logistics Solutions
- Locations — Head Office + branch office list, ideally with a map.
- Contact Us — contact form, phone, email, address(es).

10. Open Items / Next Steps

- Confirm correct Head Office address (see Section 6).
- Provide any client/testimonial content, certifications, or team photos if available, to strengthen the trust/stats section.
- Share any preferred hosting/CMS platform, or leave to developer's recommendation.
